T.W.I.M.C.

Whatever happened to the free enterprise system? Look what happened after the breakup of T.P.C. ? (The phone company.)

Just because any company with a superior product has certain restrictions doesn't mean that it is wrong. Do all the different automobile parts fit into competitors vehicles? Has GM been forced to make their parts compatible with Ford?

The only place in the world this is necessary in the world isn't in the world. It is on the ISS since everything must fit everything else.
